MJC (SA) calls for Covid 19 vigilance

We thank and praise Allah for granting us from His bounties and favours, which are innumerable. Our health being of the most important of favours alḥamdulillah.

Going into the South African winter season, the trend is for our community to develop colds and flu. We therefore call upon our community to remain vigilant during this time. Over 4000 was the number of the new Covid-19 cases of infections for the past two days, released by the health department.

We remind our community that the health protocols remain. Wearing the mask, washing the hands, maintaining social distance, and maintaining our good health is essential for our own wellbeing and to reduce the infection rate.
